Sudoku Snap

Design language v0.3

Ink on paper, framed by a viewfinder.

Sudoku Snap turns a photo of any puzzle into something you can play. The interface stays out of the way of the numbers and borrows one gesture from the camera: the corner bracket.

9			5		8			7
	8		3		2	9		5
	5	4					8	
	7		6	8			3	2
1					4			8
5			2	1	9		6	
			9		6			1
7	2	6			1		4	
		1	4	7			5	6

01

Frame it

Corner brackets mark the one thing being added, checked or finished. They never decorate.

02

Ink first

Numbers are the hero. Monospaced, high contrast, and never competing with the chrome around them.

03

Quiet until it matters

Neutral surfaces by default. Flash yellow is saved for adding a puzzle and for what needs a second look.

The flow

From a printed puzzle to a finished attempt, in six screens.

1

My puzzles

Everything you have added, with completion and attempts at a glance.

2

New puzzle

Choose a photo, paste an image, or enter the clues by hand.

3

Review clues

Check the detected numbers and fix any before you play.

4

Play

Pencil notes, mistake check, undo and a running timer.

5

Move history

Scrub back through every move of an attempt.

6

All attempts

Each run at a puzzle with its time, mistakes and result.

What you can do

- ✓ Choose a photo
- ✓ Paste an image
- ✓ Enter clues by hand
- ✓ Fix misread clues
- ✓ Pencil notes
- ✓ Mistake check on or off
- ✓ Undo and replay moves
- ✓ Time and finishes tracked

Color

Every text pair is 4.5:1 or better. Status never relies on hue alone: badges carry an icon, mistakes carry a ring.

The board, the bracket, the motion

The 9×9 grid is the product. Each state a cell can be in differs in fill, weight or outline as well as color, so the board reads for everyone.

Cell states

1px hairlines between cells · 2px ink lines between boxes · 3px ink frame

Clue
Printed on the puzzle. Ink, semibold.

Yours
Entered by you. Pencil blue, medium.

Notes
Pencil candidates in a 3×3 layout.

Selected
Pencil soft fill and a 3px ring.

Peer
Same row, column or box as the selection.

Same digit
Every cell holding the selected digit.

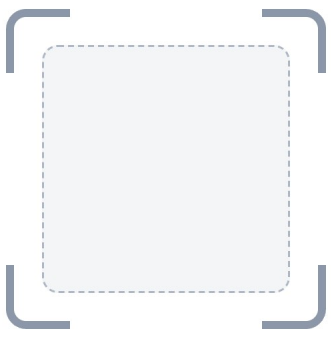

Mistake
Wrong digit with mistake check on. Tint, color and a ring.

Unclear
Detected clue to double check. Dashed outline.

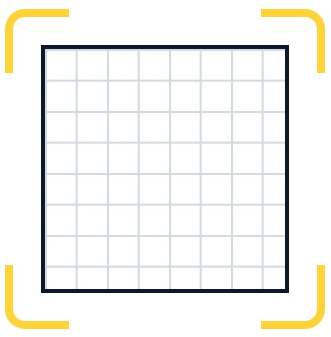

Complete
Proposed. A row, column or box finished correctly.

The corner bracket

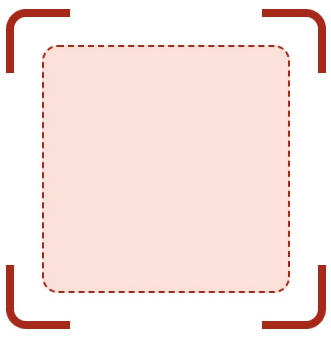

Marks the one thing being added, checked or finished. Its color says where you are.

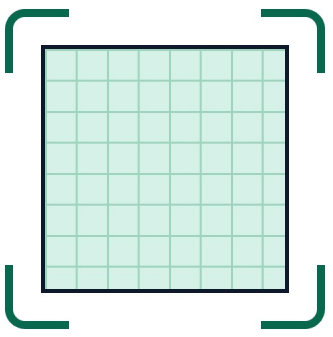

Waiting
Gray brackets around the drop zone before anything is added.

Checking
Flash brackets while you review the detected clues.

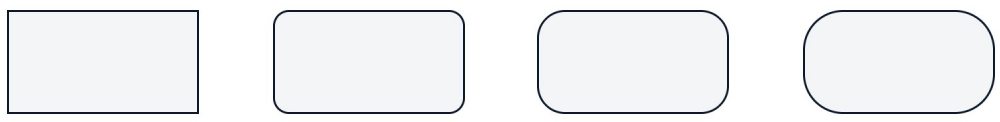

Could not read
Red brackets when no grid was found in the photo.

Completed
Proposed. The brackets close around a finished board.

Shape and space

4px base unit. Screen gutters are 16. Everything you tap is at least 44px tall, and the number pad keys are 52.

Motion

Place a digit — `120ms · ease-out`
The digit scales from 0.85 to 1 while fading in. The word Saved appears beside the timer.

Mistake — `240ms · ease-in-out`
Two 3px nudges, then the ring draws in and the counter ticks up. No sound.

Bracket lock — `160ms · ease-out`
Brackets travel 12px inward and settle on the board edge once the clues are detected.

Complete — `600ms · ease-out`
Proposed. A flash sweep moves row by row, then the brackets turn green.

With reduced motion on, every movement becomes a 100ms fade. Haptics stay.

Voice

Puzzle — A saved grid in My puzzles. It keeps its clues and every attempt.

Clues — The printed numbers. Detected from a photo, then confirmed by you.

Attempt — One run at a puzzle, with its own timer, mistakes and move history.

✓ **Saved**

✓ **Could not find a Sudoku grid. Try a clear photo of the whole board.**

✗ ~~**Oops! Your progress was successfully saved!**~~

Plain, short, and honest about what the device is doing. Say what happened, then what to try.

Components

A small kit. Surfaces are white on paper, edges are hairlines rather than shadows, and the only loud color is Flash.

BUTTONS

Confirm clues & play → | + New puzzle

Paste image | Enter clues by hand | ✎

Pencil notes Off | Pencil notes On | Mistake check On

Undo move | Undo move | < My puzzles

One ink button per screen. Flash is reserved for adding a puzzle. Toggles say On or Off in words and fill with ink when on. Radius 14, height 52.

BADGES, COUNTERS, TIMER

In progress | 0 completed | ✓ 1 completed

Review clues · Draft saved

00:00:19 | Mistakes 0 | ⚠ Mistakes 1 | ✓ Saved

Each status has its own icon shape (half disc, ring, check), so color is never the only signal.

ALERT

⚠ Could not find a Sudoku grid. Try a clear photo of the whole board.

NUMBER PAD

4 (6)	7 (2)	5	1 (5)	9 (3)
⌫				

Digits 1 to 9 and Delete, matching the keyboard. A small count shows how many of each are left. Key 7 is pressed; key 5 has all nine placed.

DROP ZONE

Choose a Sudoku photo
Idle
